

TRANSPORT & UNLOADING GRAPPLE

TRANSPORT & UNLOADING GRAPPLE

A very robust timber grapple for unloading whole logs from vehicles and for transporting to logs and feeding tables. The powerful clamp arm ensures that the load will not become stuck during unloading. The pusher is designed to let the operator has a good sight. This speeds up the unloading and reduces damage of the logs or the truck. The fork tines make it easier to reach the bottom of the load and reduce the wear. The hydraulic pusher requires a separate hydraulic function or an electrical valve.

Picture

7.5 m² fixed attachment (Pin On) for Volvo 350L

ABL CE, offer timber grapples between **5.5m²- 8.0m²** with various widths. The timber grapples adjusts for size of machine and purpose. Delivers with a quick coupler or a fixed attachment (Pin On).

Advantages

- + Durable timber grapple for demanding performance
- + Minimum impact on the logs
